OBJECTIVE

Motivated and quick-learning Software Engineer with a strong foundation in technical skills and problem-solving. Seeking to leverage my technical abilities to develop innovative solutions and contribute to a dynamic team. Eager to grow through new challenges in a progressive organization while delivering high-quality results.

EDUCATION

ANNASAHAB DANGE COLLEGE OF ENGINEERING AND TECHNOLOGY ASHTA

B.Tech in Computer Science Engineering (CGPA 8.68)

Sanjay Ghodawat Olympiad School Ankli

HSC (62.33%)

K.B.P.Vidyalay Bagani

SSC (94.20%)

Sangli , India

2023-2027

Sangli , India

2022-2023

Sangli , India

2019-2021

SKILLS

PROGRAMMING LANGUAGES: C/C++, Python, Java, JavaScript, React.js

SOFT SKILLS: Communication, Team Working, Public Speaking

Database: SQL (MySQL, Oracle)

Web Development: HTML, CSS, JS, React.js

EXPERIENCE

- Achieved certification in full stack web development gaining hands on experience on front-end and back-end.
- Completed a certified course in Embedded System Programming using Arduino and Arduino IDE, including hands-on experience with hardware and software integration.
- Completed internship focusing on front-end and back-end web application development using HTML, CSS, JavaScript, and frameworks like React and Node.js. At One Star Software Solutions

PROJECTS

1) Edusity

-Developed a responsive single-page university website using React.js, featuring Campus, Programs, Testimonials, and Contact sections with a user-friendly design, reusable components, and smooth navigation.

-Using CSS, HTML, React.js, JavaScript.

Github link: [Click Here](#)

2) MyMovieBox

Developed a dynamic movie application using React.js and the OMDb API to fetch and display movie data, featuring search functionality, movie details, and a responsive user interface.

-Using HTML, CSS, JavaScript, React.js

Github Link: [Click Here](#)

3) Music App

Built a desktop app using Python (Tkinter & Pygame) to upload, organize, and play MP3 songs; integrated metadata extraction and local playlist management.

Github Link: [Click Here](#)

4) Radar System

Radar Detection System using Arduino – Designed and implemented a radar system using Arduino, ultrasonic sensor, and servo motor to detect and visualize object distance in real-time through Processing software.

Github Link: [Click Here](#)

5) Obstacle Detection System

“Temperature & Humidity measurement” and “Obstacle detection” are two different functions in the same project, each using different sensors and serving different purposes — one measures environmental data, the other detects nearby objects.

ACHIEVEMENTS & CERTIFICATIONS

Full Stack Web Development: covering HTML, CSS, JS, React.js, database

Embedded System Development Programming

CAMPUS INVOLVEMENT

Member – **E-Yantra Robotics Club (IIT Bombay initiative)**, ADCET

Engaged in robotics and automation activities as part of the national-level e-Yantra initiative.

Member – IEEE (INDIAN INSTITUTE OF ELECTRICAL AND ELECTRONICS ENGINEERS)

Actively involved in the IEEE Student Branch, contributed to campus Events
